## 03 Skills

### Frontend

HTML, CSS (SCSS, BEM, **CSS in JS**, TailwindCSS), JavaScript, **TypeScript**, Web Components, Handlebars, **React**, Gatsby, **Next**, **React Native**, **Redux** (thunks, saga, toolkit, persist, RTK Query), MobX, react-query

### Backend

**Node.js** (Express, Fastify, **Nest**), REST API, Databases (MySQL, **PostgreSQL**, MongoDB, **OracleDB**, CosmosDB, **Redis**), SQL queries, Prisma, Serverless (**Azure Functions**), Python

### Other

unit testing (**Jest**, react-testing-library), E2E testing (**Cypress**, Detox), Git, CI/CD, Docker, AWS (S3, Secrets Manager, CodePipeline), **Headless CMS** (DatoCMS, Cloudinary), WordPress, **Mailchimp**, SendGrid, **Sentry**, Linux CLI, Figma, **SCRUM**

### Intermediate English (B2)

experience in writing correspondence and conducting meetings with the clients and coworkers

### Native Polish

---

## 04 Education

2020 - 2024

### Zachodniopomorska Szkoła Biznesu

BE, Computer Science - Mobile Application and Systems Engineer

2015 - 2020

### Szczecińskie Collegium Informatyczne

IT specialist, Game Programmer

# 05 Experience

VII 2022 - Currently

## STX Next

### **JavaScript Developer - Regular+**

- Implementing mobile & web components from scratch.
- Implementing a system similar to Twitter.
- Implementing systems based on server side rendering.
- Adding functionalities indicating various statistics on charts and tables.
- Implementing optimized CRUD endpoints to manage huge data from the database.
- Deployments on Linux & Windows environments.
- Working with files & images on backend side.
- Implementing from scratch interactive ERD diagrams using react-flow.
- Performance and SEO optimizations on the front-end side.
- Working with legacy code & refactoring.
- Integrations of external systems to client app.
- Handling data migrations.
- Arranging and conducting meetings with clients.

Besides that, I was responsible for project estimations for new potential clients.

IV 2021 - VII 2022

## Intive

### **Software Engineer - Junior**

- Working with microservices.
- Implementing module to scrapping recipes data from partner websites and saving in proper format in our database.
- Implementing endpoints to manage recipes.
- Implementing managing ingredients in recipe on mobile devices using native touches.
- Maintenance of a component library used in every microservice, the designs won the UX Design Award and iF Design Award.
- Building from scratch serverless backend based on Azure Functions.
- Implementing database connection and endpoint returns orders with pagination.
